**MOVING?** Please use form inside paper and give full information. Mailing list is run on Friday for following week.

President Jimmy Carter visited our town last week and aside from a number of Democratic Party hacks it was a rather quiet affair and everybody was greatly relieved when no really untoward incidents occurred. The sponsors had a hard time getting all the tickets sold, the last moved in day before Carter arrived. As usual he sniped a bit at Farmers & Ranchers, the Oil Boys, and other groups who feel they have a right to resist the "transfer" of money, oil, gas, prices that justify folks in agriculture making a decent living while feeding the rest of the country and half the world. There were no surprises.

Carter, while in Texas, again repeated his ideas on Taxes and he still don't show any great understanding of how Taxes are the key to more and better jobs provided they don't bleed the Economy white. At his news conference (CONT. ON PAGE 7)

### Australians Dislike Carter's Beef Import Expansion Scheme, Too!

While there has been considerable doubt that Australia, just coming out of a disastrous two-year drought, would be able to fill much of the projected 200 million pounds this year under president Carter's beef import expansion plan, it seems the Aussies at home are about as upset as U. S. cattlemen.

Latent news from Down Under is that the Australian cattle herd is down 13% due to the drought and with both Japan and the U. S. planning increased beef imports the Australian consumers are up in arms since the price of beef has soared 30%. Australian dock workers are reported refusing to load export beef, too. Now ain't that just too bad?

### Ooops!

Another embarrassing bureaucratic blunder surfaced recently when Barry Bosworth, President Carter's director of the Council of Wage and Price Stabilization sounded off about the Administration's plans to increase beef imports. Bosworth announced the Administration goal was \$55 "beef". This sent chills down the spines of the beef and cattle industries, since \$55 beef would roll fed cattle prices back to about the \$34 range. Both Bosworth and Agriculture Secretary Bergland, when asked about this "goal" admitted they had had his cattle and his beef.

### Swine Inventory in 14 States Estimated 54.9 Million, 1% Up

Washington, June 22 (USDA) — Inventory of hogs and pigs on June 1, 1978 in the U. S. was estimated at 54.9 million head, 1% above last year and nearly 2% higher than two years ago, according to the Crop Reporting Board. The inventory increase was limited by death losses which were about one-fifth more than a year ago due to effects of prolonged cold weather and disease problems.

### Cattle Raisers Ask Tax Limitations, Special Session

Fort Worth — A constitutional limitation on state and local taxes similar to California's Proposition 13 has been called for by the president of the Texas and Southwestern Cattle Raisers Association, John Armstrong, at a meeting representing one of the larger groups of ranchers in Texas.

In a letter to Governor Dolph Briscoe, Armstrong said, "I would like to request that you give serious thought to this issue."

### Fed Cattle Lower Monday at Most Terminal Markets, Hogs Were Up Sharply, Receipts Reported Down

Slaughter cattle receipts were more than 28% under last Monday's totals at the major markets, and hog receipts were off more than 36%. Fed steers and heifers were mostly sharply lower than on those days last week when representative supplies were available; however, a few markets reported advances in the face of reduced supplies. Cows and bulls were steady at best, but most points reported declines of from 50¢ to \$3 in extreme cases. Hogs moved briskly at all points and some of the heavier weights chalked up the longer gains. Estimates of Monday's cattle slaughter called for 15,000 less than a year ago, about the same as last Monday. Hog kill was estimated Monday at 304,000, or 61,000 under the same date last year. Quotations of choice and prime steers and heifers and the mixed good and choice grades and US 1-3 hogs scaling 200 to 270 pounds included:

"The Old Back Again — Hurt It On The First Durn Sale."

(CONT. FROM PAGE 1)

head, was nearly 1% above both last year and 2 years ago. The increased number of market hogs in the heavier weight groups reflects some holdover from the late fall pig crop due to the severe winter weather which limited weight gains.

The 14 quarterly states estimate was 88% of the U.S. total inventory. These states, with 47.0 million head, were nearly 1% above 1977 and 2% above 1976.

Pig crop (December 1977-May 1978): The December 1977-May 1978 U.S. pig crop was 42.3 million head, 1% below last year, but slightly above two years earlier.

Slightly more than 6.01 million sows were farrowed during this 6 months period, 1% below the number farrowing last year. Pigs saved per litter at 7.04 were the lowest since 1960.

A smaller litter size combined with conception problems reduced the expected pig crop for this period.

In the 14 quarterly states, the December-May pig crop was 38.3 million head, 2% below last year. The December-February pig crop at 15.6 million was slightly above last year, while the March-May total, at 30.7 million head, declined 5% from 1977.

Farrowing intentions: U.S. Producers intend to farrow 6.26 million sows during the June-November period, an increase of 4% from the same period in 1977 and 7% above the corresponding periods in 1976.

Intentions in the 14 quarterly states for June-August are 2.69 million sows, an increase of 3% over this quarter in 1977 but virtually unchanged from the intentions published in the March 1 report. For the September-November quarter, these states intend to farrow

## Panhandle Directs

Amarillo, June 22, (P-8) — Slaughter steers closed 2.00-3.00 lower in direct response to sharply lower carcass beef trade. Slaughter heifers closed mostly 1.00 lower in limited trading. Receipts for the week very light, average weight

## Western Heritage

(CONT. FROM PAGE 1)

In addition to the twenty-two auction pieces, art enthusiasts will have an opportunity during the evening to purchase seven select pieces of art. These will include one watercolor and one bronze by C. M. Russell, an oil painting by Frederic Remington, two oils by Carl Seitzer, a pen and ink by E. William Gollings and an oil painting by Frank Tenney Johnson.

Sponsors of the sale are former Texas Governor and Santa Gertrudis breeder John Connally, Texas businessman and Santa Gertrudis breeder Joe Marchman, Houston civic leader and Quarter Horse breeder Louis M. Pearce, Jr., oilman and Quarter Horse breeder Rex C. Gable, leather goods tycoon John S. Justin, Jr., and the National Cowboy Hall of Fame.

The animals represent their industries' leading bloodlines and are designed by many of the premier ranching families in the Southwest and United States.

Many of the artists consigning pieces are expected to be in attendance and include such well-known names as Jim Reno, Lajos Markos, Melvin Warren, Robert Summers and Wilson Hurley. The name "Western Heritage Sale" was chosen because all three components — the cattle who provided the first major industry as the West was settled, the horses who were the mainstay of Western life, and the Western art that preserved and chronicled the West from the past to the present — all represent a vital part of the true Western Heritage.

## Positive Aspects Of Meat Eating Subject of Paper

East Lansing, Mich. — Reducing the risks of heart disease by replacing animal fats with vegetable fats in diets is unlikely, says Albert M. Pearson, Michigan State University food scientist.

Pearson offered positive aspects of meat eating in a paper, "Meat as a Nutrient in the Human Diet," presented June 20 during the American Meat Science Association Reciprocal Meeting Conference at the University of Connecticut, Storrs.

"All available evidence suggests there is no clear-cut relationship between meat consumption and cardiovascular disease," says Pearson, the recipient of numerous national awards for meat research.

The increasing rate of coronary heart disease in the United States during the past 60 years has often been blamed on meat consumption. But consumption of animal fats declined by nine percent in that period, while vegetable fat consumption increased three-fold, says Pearson. This indicates, but does not prove, that vegetable fats contributed to the increased rate, according to Pearson.

## Randy Harrell Sets Beefmaster Dispersal July 9, Three Rivers

Three Rivers, Texas — The complete Beefmaster dispersal of the

Ever thine, The Editor.

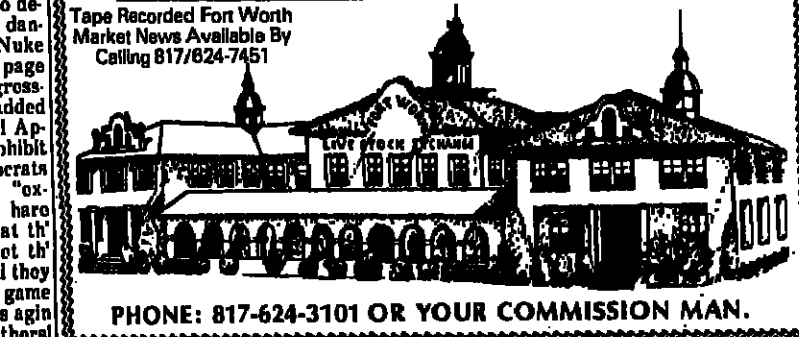

P. S.: Uncle Dunk notes where Sen. Malcolm Wallop, Wyoming, introduced a bill to symbolically remove import quotas, tariffs and subsidies on peanuts as retaliation again the move on beef imports. What most folks don't seem to recognize is that while Jimmy Carter did raise a few peanuts, he was primarily and got to be a millionaire, by BUYING peanuts from farmers. This makes it easy to understand his lack of sympathy for farmers & cattlemen. He was a BUYER of farm stuff! Dunk says that demonstrators of various kinds that are trying to stop development of nuclear power plants remind him of the people who demonstrated again introduction of electricity in New York City over a hundred years ago. These protesters went to Central Park and each day electrocuted a dog to demonstrate that electric power was dangerous. One of these days the Nuke Kooks will enjoy the same kind of page in history. Dunk notes that Congressman Hanson from Missouri added an amendment to the Agricultural Appropriations Bill which would prohibit USDA, FDA and other Burrocrats from using federal funds to pay "experts" to appear to prove their harebrained programs are really what the country needs. He sure will support the bill if it becomes law and they are no longer allowed to rig the game and stack the deck with Tax dollars again the rest of us! — Thassall, Brothers!

While Carter was pointing the finger of scorn at any idea that the Capital Gains Tax be reduced, it might be well for him to go back to school long enough to survive the basic economics of what makes the American System tick. And, with all of his faults, this System is still the best in the world for even the lowest of us Indians on the Tolemo Pole. Congress not to proceed and over-ride any veto.

# Cattle Raisers Ask Tax Limitations, Special Session

(CONT. FROM PAGE 1)

To calling a special session of the Legislature to consider a constitutional limitation on state and local taxes. This would provide the people of our state with the power of initiative and referendum. In this way, the people of Texas will have the same mechanism to influence a state government on this issue as the people of California. Armstrong referred to the handside vote for Proposition 13 in California which has caught the attention of public officials and private citizens all over the nation. "We must strike while the sentiment is strong to limit taxation, thus slowing down the overdevelopment of bureaucracy. In six or eight more months, this enthusiasm and concern may well have cooled. Meaningful tax limitations put on by the Legislature depend on the backing of an aroused citizenry." Armstrong added that the upward trend of property taxes must be stemmed.

The Texas Constitution provides for regular sessions of the Legislature only in odd numbered years from January to June. Unless called into a special session by the governor, the Legislature will not meet until January, 1979.

Now It's "North American International Livestock Exposition"

Kentucky Commissioner of Agriculture Thomas O. Harris, and Harold Workman, Manager of the North American Livestock Exposition, made a joint announcement recently indicating that the name of the plant livestock show has been altered to better represent the show's activities.

The North American will now contain the additional word "International". Thus, the show name is now officially, "The North American International Livestock Exposition".

According to Commissioner Harris and Show Manager Workman, the name alteration came following lengthy deliberations among the North American Executive Committee and Kentucky Governor Julian Carroll. Following the 1977 Louisville Exposition, show officials determined that livestock exhibitors from 48 states and foreign countries had participated in the show, making it one of the largest of its kind in the hemisphere. In total, Workman said more than 10,000 head of beef cattle, dairy cattle, quarter horses, swine, and sheep were shown at the North American last November, taking home more than \$200,000 in premium money. Harris added that much interest has been shown in recent months to add the word "International" to the show name, particularly in view of the fact that the show has grown so large and representative of both U. S. and foreign livestock interests.

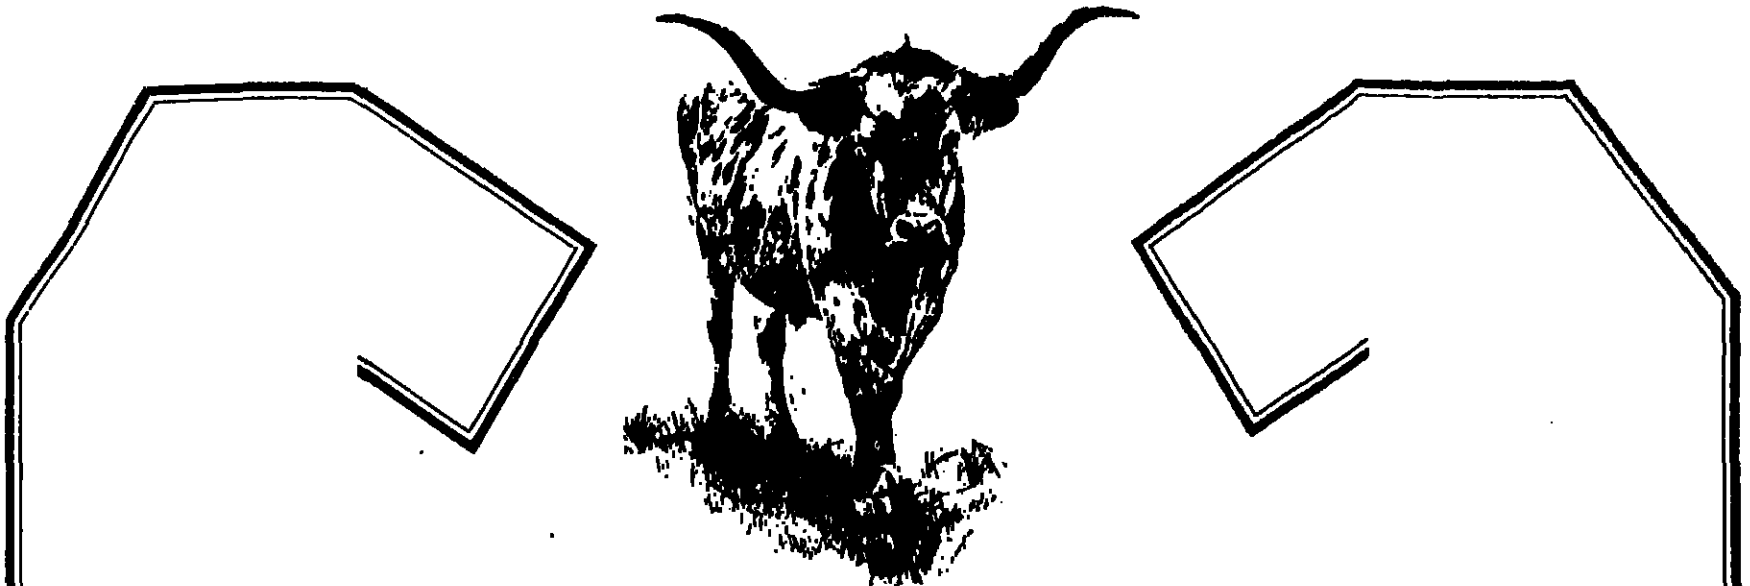

When making the name change announcement, Harris and Workman also confirmed that two director's seats have been added to the Executive Committee of the North American International Livestock Exposition.

Show dates for this year have been set for November 4-18. Now in its fifth year of operation, The North American International Livestock Exposition will again be held at the Kentucky Fair and Exposition Center in Louisville and is expected to bring nearly \$10 million to the Jefferson County/Kentucky area.

# Temporary Screwworm Distribution Center to San Angelo

Mission, June 15: Seven Texas counties recorded their first 1978 screwworm cases during the June 8 through 14 period, reports Dr. M. E. Meadows, Jr. The director of the U.S. Department of Agriculture's Screwworm Eradication Program says the Texas screwworm count climbed from 38 in 17 counties to 67 in 24 counties during the one-week period.

First positive 1978 identification of the parasite from samples in Garza, Kent, Scurry, Sterling, Runnels, Concho, and Jeff Davis counties was made in the Animal and Plant Health Inspection Service lab during the week. Twenty-four cases have been reported in 14 counties within flying distance of San Angelo since May 15. The program is to establish a temporary distribution center at San Angelo during the week starting June 18.

# Beef Markets To Weaken A Bit

College Station, Texas - The nation's cattlemen are enjoying a bit of prosperity these days due to improved cattle markets. The situation might change a little, however, during the second half of the year, believe livestock marketing specialists with the Texas Agricultural Extension Service. Dr. Ed Uvacek foresees a weakening cattle prices in the third quarter of the year (July through September), with some strength returning as the year's end approaches. He believes the market could easily carry into the new year.

"Fed cattle prices will probably be at their lowest levels in September or October and then should begin to gather strength," he says. "It is somewhat of a basic pattern. In fact the feeder market will remain dependent on the fed cattle market price level."

Weakness in the fed cattle market this fall could easily cause feeder cattle coming out then to lose money, notes Uvacek. "This could really hurt the feeder market since the cattlemen will be selling their 1978 calves about that time. Fortunately, feeder cattle numbers are down sharply this year, so this should help feeder prices somewhat."

The marketing specialist believes that beef prices will come down somewhat in response to some consumer reluctance. "It is somewhat difficult to justify the present price levels simply on the basis of supply and demand. Supplies are not off that much, and it's difficult to believe that much in such a short period of time."

Beef production should only be down about 2% during the July-September period from that same period a year ago. Although fed cattle marketing should be up substantially, the reduction in total beef production will be caused by a decrease in carcass weight and heifer slaughter and much lower cow slaughter levels.

# AQUA SPONSORS ALL-AROUND HIGH SCHOOL RODEO FINALS AWARDS

The American Quarter Horse Association, the world's largest equine registry, will sponsor the All-Around champion boy and girl awards at the National High School Rodeo Association Finals, July 31 through August 6, in Huron, South Dakota. The National High School Rodeo Association was formed in 1951. Today, the Association boasts more than 14,000 members in 26 states and two provinces of Canada. The NHRA Finals is one of the world's largest rodeos, with over 1,200 young champions expected to compete in the seven-day competition. Events include calf roping, barrel racing, riding, steer wrestling, bull riding, saddle bronc riding, cutting, barrel racing, pole bending, breakaway roping, goat tying and dally team roping.

Custom-made, trophy saddles will go to the individual boy and girl winning the all-around titles, which are determined by the greatest number of points earned in events during the finals. AQHA President Bill Reed, Albuquerque, New Mexico, stated: "By AQHA's participation in sponsoring the all-around titles and girl awards, we are acknowledging the thousands of young people heavily involved in the great sport of rodeo."

set in April, 1977, when 17,783 Quarter Horses claimed by the American Quarter Horse Association were registered. Another 8,049 horses were registered in 1977. The total number of horses registered by the AQHA in 1977 was 25,832. The top ten registered horses were from Kansas, Missouri, Illinois, Colorado, Ohio and Indiana.

Once used primarily for ranch work in the Southwest, the figures illustrate the change in the horse's role in society. Since five of the top ten registered horses are from the Midwest, the fact that horses are being purchased more and more for recreation purposes is pointed out by the figures.
